**Plaatsen grondpotten • Placing ground sockets**

- Zet de posities van de grondpotten uit, gemeten van center tot center
  - Graaf gaten van 35 x 35 cm, 50 cm diep
  - Plaats de grondpotten waterpas, let op de richting
  - Gebruik 75 Kg beton per grondpot, optioneel 3x BTP005
- Mark out the positions of the ground sockets measured from centre to centre
  - Dig holes 35 x 35 cm, 50 cm deep
  - Place the ground sockets horizontally, paying attention to the direction
  - Use 75 Kg of concrete per ground socket, optionally 3x BTP005

Let op de richting van de grondpotten  
*Pay attention to the direction of the ground sockets*

De glijgoot van de paal moet aan de voorzijde  
*The slide groove of the post must be at the front*

### Plaatsen constructie • Installation of construction

- Plaats de palen in de grondpotten, let op de modellen
- Leg de dwarsliggers bovenop de palen
- Monteer de dwarsliggers, nog niet volledig aandraaien!
- Na deze montage alles volledig aandraaien

- Place the poles in the ground sockets, paying attention to the models
- Put the crossbars on top of the posts
- Mount the crossbars, do not tighten them completely yet!
- After this assembly, tighten everything completely

Net hangen • Hanging net

- Leg het net uit over de volledige lengte
- Tel de mazen en verdeel ze gelijkmatig over de 3 vlakken
- Monteer het net in de bovenhoeken (1)
- Monteer het net aan de dwarsliggers (2)
- Zorg voor een verticale lijn van het net voor de binnenste palen
- Monteer het net aan de palen (3)

- Lay out the net over its entire length
- Count the meshes and divide them evenly between the 3 surfaces
- Install the net in the upper corners (1)
- Mount the net to the crossbars (2)
- Provide a vertical line of the net in front of the inner posts
- Fasten the net to the posts (3)

### Montage spankabels • Mounting tension cables

- Draai de spanschroeven tot het maximum uit
- Rijg de langste kabel door de onderste rij mazen alsook door de ogen op de binnenste palen
- Monteer de uiteindes van de kabel met de nodige bevestigingen, let erop dat je het geheel strak aantrekt
- Draai de spanschroef terug in om het geheel aan te spannen
- Herhaal dit voor de schuine spansystemen, hier hoef je niet te rijgen

- Turn the turnbuckles to the maximum
- Thread the longest cable through the bottom row of meshes as well as through the eyes on the inner posts
- Mount the ends of the cable with the necessary fixings, make sure you pull it tight
- Turn the turnbuckle back in to tighten it
- Repeat for the inclined tensioning systems, no need to thread here
